## Welcome Message from the Chairpersons

On behalf of the organizing, technical and local committees of IEEE International Instrumentation and Measurement Technology Conference (I2MTC 2014), we welcome you to Montevideo. Here in Uruguay we are all concerned with sustainable development, and so it has been chosen as the theme of the conference. Our excellent and broad technical program covers the traditional span of instrumentation and measurement fields, and reflecting the main theme, the program also contains many sessions dealing with issues related to it.

As usual, we start with a full day of tutorials offering more than a dozen fascinating topics. We have three esteemed keynote speakers who set the tone for the three days of the conference which consists of five parallel tracks of oral and one track of poster presentations. They are Dr. Pasquale Arpaia, from the CERN, Dr. David Leibrandt from NIST and the recipient of the IEEE 2014 Keithley Award, Thomas Linnenbrik. We appreciate and we are very much thankful to them for coming and sharing their knowledge and experiences with us.

This is the first time the IMTC Conference is held in Latin-America and in the southern hemisphere as well. Our local chapter, one of the few and oldest IMS Chapters in Region 9, is very, very happy and proud of making history and hosting this Conference. Most appropriately, this year also marks the silver anniversary of the Uruguayan Section, and for our volunteers this Conference is the most significant part of the Celebration activities.

It is with a great satisfaction that we are honored to receive in our Country the presence of so many scientists and engineers from all over the world. Enjoy Montevideo; it is a nice city that strongly conserves its Spanish and European heritage. Just in front of the Conference hotel – which was built in the 50's and enlarged later– is the main square, with the old and the new President's houses, and the very nice, 160 years old, "Solis Theater" which bears the name of the Spanish ship captain that discovered our land. You will find the old city through the gate of the Citadel, the fort that protected the port and the old city that lies to the west. We also encourage you to visit the country.

Again, welcome, and please do enjoy the Conference and your stay.

## I<sup>2</sup>MTC Tradition

The first *IEEE Instrumentation and Measurement Technology Conference* was held in 1984 aboard the Queen Mary in Long Beach, California, but its origins stretch back nearly 20 years earlier to the *Electrical and Electronic Measurement and Test Instrument Conference* held each year from 1966 until 1981 in Ottawa, Canada.
